# QUANTUM DYNAMO

## The Power Chair for Playing

Quantum™ Rehab realizes the potential of the versatile Quantum product line to serve the needs of children with a variety of mobility issues. The new Quantum Dynamo® and Dynamo ATS are the first pediatric power bases to offer Pride's patented mid-wheel drive

design. Both the Dynamo and Dynamo ATS are available with the pediatric Synergy™ seating system, fully programmable electronics, pediatric swing-away footrests and the dependability of a Quantum product.

## Why choose the Quantum™ Dynamo® for pediatrics?

The Quantum Dynamo is an ideal power base for pediatric use. Its compact design fits easily into the close quarters of a child's environment, while its 16.5" turning radius gives the unit smooth maneuverability

in the home, at school or on the playground. To keep children eye-to-eye with their friends, both the Dynamo and Dynamo ATS offer an optional seat-to-floor height as low as 15.5".

## The Quantum™ Dynamo® ATS

The Quantum Dynamo ATS offers all of the same features as the Dynamo, with the added benefit of Active-Trac Suspension, while maintaining an impressive 18" turning radius. Pride's Active-Trac Suspension allows active children the opportunity to negotiate the roughest terrain to effortlessly keep up with their friends and family.

Quantum Dynamo ATS with Snug Seat Panda in Tilt/Recline Position

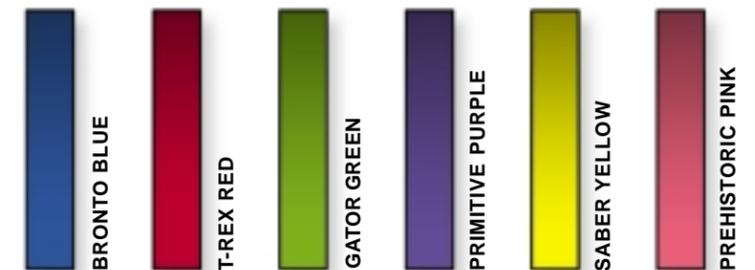

Quantum Rehab is devoted solely to customizing the Quantum Power Chair line with specialty seating systems, controllers and a variety of rehab accessories based on an individual's needs and preferences. Our goal is to see that no child's needs go unmet.

Quantum Dynamo ATS shown in Gator Green with Synergy™ seating system and PG Remote Plus controller

## Other features of the Dynamo and Dynamo ATS include:

- Stylish and sporty non-medical appearance.
- Seating systems as small as 10" x 10" that can grow with the child.
- Available with all of Quantum Rehab's specialty drive controls.
- Able to interface with a variety of power positioning systems including tilt, tilt/recline and tilt/recline with elevating seat combos.
- 10" knobby drive wheels and patented mid-wheel drive technology offer superior traction over most surfaces that today's active child wants to explore.
- The Dynamo and Dynamo ATS come in a variety of fun colors.

A special Colorbook White shroud that can be colored with dry-erase markers is also available.

\*Colors may vary slightly from those shown.

Tiger Folding Mobility Frame  
The frame folds for ease of storage and transport.
